

QuattroCom Partners with Telia Carrier to Boost Connectivity in Querétaro, Mexico

Stockholm and Querétaro, Mexico, 26 August 2020 – [QuattroCom](#) today announced a partnership with [Telia Carrier](#) to provide dedicated Internet access to its enterprise businesses in the city of Querétaro, Mexico. The partnership gives QuattroCom access to Telia Carrier's number one ranked global network, supporting enterprise business demands for the increasing need for scalable, high-performance connectivity in the city's growing business market.

The city of Querétaro, located in central Mexico, is experiencing an industrial and economic development boom with the second highest GDP per capita among Mexico's metropolitan areas. Located near Mexico City, Querétaro acts as a central hub for cloud and data center providers linking Mexican and international companies. The city is also the fastest-growing city in the country, thanks to booming IT, logistics services, aircraft manufacturing, maintenance and automotive industries.

QuattroCom is a complementary partner to Telia Carrier with an established infrastructure network, extensive construction capabilities and flexible connectivity solutions with rapid delivery that penetrate the most important markets in the region and provide unique and diverse choices for connectivity needs.

"Partnering with QuattroCom allows us to reach the burgeoning businesses in the city Querétaro" said Luis Velasquez, Mexico business manager, Telia Carrier. "Aside from being recognized as being one of the best places to do business in the Americas, Querétaro is also considered to be Mexico's "Silicon Valley." This partnership allows us to strengthen our position to deliver connectivity and high-quality local access to these thriving businesses and enables the local infrastructure to grow."

Businesses in Querétaro can now take advantage of Telia Carrier's number one ranked [global backbone, AS1299](#), as well as the local availability of high-speed [IP Transit](#), [Cloud Connect](#), [DDoS Mitigation](#), [Ethernet](#) and [IPX services](#) for network operators, content providers, and enterprises alike. This latest partnership and expansion is a part of Telia Carrier's broader development in Mexico, reflecting the growing demand for wholesale and enterprise services in the country.

"By partnering with Telia Carrier and tapping into their IP backbone, we can now bring international connectivity to businesses in Querétaro, a region that is rapidly growing as an IT hub," said Álvaro Alcalá CEO, QuattroCom. "Working with Telia Carrier assures our business customers reliable and secure Internet connections as well as direct private access to major cloud service providers with lower latency and more capacity for growth."

Telia Carrier's continued, organic expansion in the region provides a crucial backbone of services for major international application, content, security and cloud providers that require low latency and high-

speed connectivity for their edge deployments. It also creates additional choice for local, in-market connectivity needs of regional service providers with optimized access to the content ecosystem.
